metal ideas

“BIG” è un sistema modulare progettato per la realizzazione di strutture e composizioni dedicate all'arredamento contemporaneo. Si caratterizza per l'essenzialità del design e per la sua versatilità d'impiego.

*“BIG” is a modular system designed for creating frames and compositions for modern furniture. It is simple in its design and versatile in its possible uses.*

## SISTEMA LINEARE

*LINEAR SET-UP*

Si compone di due tipi differenti di profilo 15x15. Il profilo A (pieno) è usato nelle situazioni in cui si vogliono vedere gli elementi perfettamente finiti e allineati con il profilo B (cavo), che consente invece l'alloggiamento delle giunzioni.

Il risultato finale è la massima essenzialità del design. L'unico oggetto "estraneo" è il grano M5 di bloccaggio della giunzione, che rimane comunque a filo con il profilo.

BIG1 è pratico ed efficace nel montaggio e perfetto nel risultato estetico.

*BIG 1 is made up of two different types of 15x15 profiles. Profile A (full) is used to achieve a perfectly finished look, aligned with profile B (cable), which is used to house the joints.*

*The end result is an ultra-sleek design. The only 'stand-out' element is the M5 grub screw to fix the joint, which nonetheless is flush with the profile.*

*BIG 1 is practical and efficient to assemble, and delivers the perfect end result.*

E' composto da un unico profilo B (cavo) 15x15. Le varie parti vengono unite con i tue tipi di giunzioni a 3 vie o a 4 vie. Queste giunzioni permettono di ottenere qualsivoglia struttura. Tutto è fissato con un semplice grano M5 su ogni braccio della giunzione. Massima praticità nel montaggio ed elasticità d'impiego.

*BIG 2 is made up of a single profile B (cable), measuring 15x15. The different parts are joined together by two different types of joints, either 3-way or 4-way. These joints allow any type of frame to be created. Everything is fixed in place with a simple M5 grub screw on each arm of the joint. Ultra practical to assemble and flexible in its use.*

## PROFILO REGGIPIANO "R" SHELF PROFILE "R"

BIG 1 - BIG 2

### Applicazione / Application

In opzione al profilo B (cavo) si può usare il profilo "R" per sostenere i vari ripiano della composizione, dando perfetta linearità e praticità d'uso alla struttura.

As an alternative to profile B (cable), profile "R" can be used to support the different shelves in the composition, providing a perfectly linear look and making the frame practical to use.

Su richiesta vengono eseguiti schienali su misura per i vani della struttura ideata dal cliente. Essa accoglie e maschera anche le due piccole attaccaglie, anch'esse fornite come optional. Lo schienale è trattenuto da quattro perni opportunamente sagomati per quest'uso.

On request, back panels can be made to measure for the compartments in a frame designed by the customer. This frame houses and masks two small hanging fixings, also provided as an optional. The back panel is held in place by four specifically designed pins.

## FAI DA TE

DIY

Per la clientela che desidera gestire internamente le richieste del proprio mercato, riportiamo le quote per la lavorazione dei profili, al fine di ottenere un risultato ottimale. Va da sé che in questi casi, vengono forniti i profili direttamente in barra da 6 metri lineari con i relativi accessori.

*For customers who wish to manage requests from their specific market internally, we provide the costs for processing profiles, so as to obtain the best end result. In such cases, the profiles are supplied directly in 6 metre bars with the relevant accessories.*
